(Ivana Lučića 3, Zagreb)

**IGOR SALOPEK**

*Opća bolnica Karlovac; Integrativni centar mentalnog zdravlja, Karlovac, Hrvatska /  
Karlovac General Hospital; Integrative Centre for Mental Healthcare, Karlovac, Croatia*

## **IZAZOVI U IMPLEMENTACIJI MODELA PSIHIJATRIJE U ZAJEDNICI**

Implementacija modela psihijatrije u zajednici predstavlja aktualno jedan od najznačajnijih stručnih iskoraka u psihijatrijskoj skrbi. Konceptualizirajući ga u okvirima integrativnosti, pluriperspektivizma i multidisciplinarnosti, iskustva referentnih zdravstvenih sustava pokazuju da se radi o najučinkovitijem postojećem modelu pristupa liječenju mentalnih poteškoća. U ovom izlaganju bit će prikazan početak provedbe pilot projekta Ministarstva zdravlja »Pokretanje timova za zaštitu mentalnog zdravlja u zajednici«, kojem je cilj implementirati sustav pristupa pacijentu s težištem liječenja u njegovu vlastitom domu te boljom kvalitetom života i redukcijom stigme psihičkih smetnji kao ključnim ishodima. Pritom, osnivanje Integrativnog centra mentalnog zdravlja u Karlovcu dodatni je doprinos razvoju spomenutih pristupa.

## **CHALLENGES IN THE IMPLEMENTATION OF COMMUNITY PSYCHIATRY MODELS**

Implementing the psychiatry community model currently represents one of the most significant professional breakthroughs in psychiatric care. Conceptualizing it within the framework of integrativity, pluriperspectivity and multidisciplinary, the experiences of the referential healthcare systems show that this is the most efficient existing model approach in treating mental disorders. The following presentation will show the beginning of the implementation of the Croatian Ministry of Healthcare's pilot project "Launching teams for the protection of mental health in a community". Its goal is to implement a system of patient approach with the emphasis on treating them in their own homes, highlighting the better life quality and the decrease of stigmatization of mental disorders as the key outcomes. At the same time, the founding of the Integrative Centre for Mental Healthcare in Karlovac is an additional contribution to the development of the above-mentioned approach.
